Our Legal Tech Toolkit

Check/review

- ▶ **Lexis Draft** – proof reading tool which finds drafting irregularities
- ▶ **Luminance** – AI platform for fast and accurate document review during due diligence and bulk redaction

Execute/complete

- ▶ **DocuSign** – platform for signing documents electronically, which is integrated with other software including **HighQ**
- ▶ **Legatics** – a transaction management platform that generates CP checklists, documents lists, and closing checklist

Initiate/draft

- ▶ **Contract Express** and **Clarilis** – document automation software for generating first drafts
- ▶ **Search Me** – part of the firm's KM system containing know how, Standard Documents, precedents and other supporting materials for drafting
- ▶ **StructureFlow** – a tool used for creating complex, interactive structure diagrams and steps papers

Collaborate/negotiate

- ▶ **HighQ Collaborate** and **Microsoft Teams** – feature collaboration capabilities

Extract/report

- ▶ **Legatics** and **Luminance** – all of these tools feature data extraction, tracking and reporting capability for use during and at the end of a matter
- ▶ **Search Me** – submit materials at the end of the matter for use by the firm
- ▶ **StructureFlow** – can be used as a visual record of a transaction, including links to key documentation as an interactive transaction bible

Project Management

HighQ Collaborate and Luminance – both of these tools feature project management capability

pilot stage/in the pipeline
